

30kWh Industrial Cabinet for Edge Computing

The EDGE 5 is a Micro Data Centre all in one rack, enabling localised computing to take place. The rack is cooled via a side mounted air conditioning unit that ducts cold air to the front of the rack to cool the ...

House your entire edge computing infrastructure in a single secure, prefabricated micro data center cabinet with self-contained cooling, monitoring, & more.

It is suitable for scenarios such as communication base stations, edge computing, and microgrids. Its features include high protection, intelligent BMS/EMS system, diverse input and output interfaces, ...

The outdoor photovoltaic energy cabinet can provide reliable housing for network servers, edge computers, professional equipment, monitoring systems, photovoltaic, and battery systems.

This air-cooling outdoor cabinet is now available on the market with a 30kW hybrid-coupled system, capable of both on-grid and off-grid operations. Additionally, H30 could be programmed to discharge ...

The on/off-grid large industrial container on the market for its 30kW Hybrid-Coupled system. Also, H30 could be programmed to discharge and meet the energy demand on project basis, designed for ...

Industrial ESS Cabinets provide megawatt-scale energy storage for factories, data centers & utilities. Discover how these high-capacity battery systems reduce demand charges, enable renewables ...

House everything you need to run your business or edge computing location in a neat, enclosed cabinet. EdgeRacks eliminate the need for messy IT or networking closets.

Commercial and Industrial Backup Power: Businesses and industrial operations use stackable energy storage as a backup power solution to maintain operations during power outages.

Designed for commercial, industrial, and microgrid applications, it integrates a 30kW PCS with a 60kWh LiFePO₄ battery bank to provide safe, efficient, and reliable power storage.
