

# Annual power generation of Fuchuan wind power

Details Commissioning: Turbine (s): (manufacturer name not available) Total nominal power: 50,000 kW  
Operational Onshore wind farm Operator: China Datang Corporation renewable Power Co

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.

The world's first 16-megawatt ultra-large-capacity offshore wind turbine unit achieved 24-hour full-power operation on Friday, with a daily electricity generation of 384,100 kilowatt-hours, a new ...

The project generates 88,410MWh electricity thereby offsetting 69,897t of carbon dioxide emissions (CO2) a year. The project is currently active. The project got commissioned in December 2014. ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

The worldwide total cumulative installed electricity generation capacity from wind power has increased rapidly since the start of the third millennium, and as of the end of 2022, it amounts to almost 900 GW.

The project is expected to supply an annual average of 95,646 MWh of zero-emission electricity to CSG during the fixed 10-year crediting period, which will replace power generation of those fossil fuel-fired ...
