

Countries worldwide, including Germany, Spain, China, the United States, and others, are rapidly expanding their solar power infrastructure. China has been a particularly prominent player, contributing nearly ...

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

Visit [USA.gov](https://www.usa.gov) to learn how the U.S. government is responding to Winter Storm Fern. Committed to Restoring America's Energy Dominance.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Explore 2025 solar siting trends across the U.S., including site availability, parcel size, and hosting capacity shifts. Insights to guide your next project.

As of February 2026, there are 4,155 planned solar projects in development in the US, according to Cleanview's project tracker. Their total planned capacity is 693,408 MW.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, we cover the largest solar energy projects currently ...

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the second half of the ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.
