

The market is currently led by autonomous solar producers, of which there are now more than 50,000 in the country. Armenia's cumulative solar capacity has reached 1.1 GW, the country's ...

Armenia adds around 615 MW of solar in 2025 Armenia enjoyed a record year for solar deployment last year, surpassing 1 GW of cumulative solar capacity.

Solar, on the other hand, can be installed nearly everywhere with relative ease. Armenia's wind energy sector remains minuscule, contributing just 1.22 GWh to Armenia's electricity output in ...

Armenia has dramatically accelerated its transition to renewable energy, achieving its strategic target of 1,000 MW of solar power capacity four years ahead

As recently as 2024, the country's total installed solar capacity stood at 402 MW. Reaching the 1000 MW milestone so quickly demonstrates an incredible acceleration in solar ...

Major Solar Projects Several large-scale solar power plants have come online in recent years, significantly contributing to the growth of solar energy production. The Masrik-1 Solar Plant, ...

Armenia's solar sector saw record growth in 2025, adding 615 MW to reach 1.1 GW total and meet a key 2030 national energy target five years ahead of schedule.

The number of household solar power plants grew by 60% in 2025, according to an Armenian press briefing, while their capacity grew by 52% year-on-year. Armenia previously ...

In recent years, the field of solar energy in Armenia has developed rapidly. Solar power plants with a total installed capacity of 1,045 megawatts are already...

Armenia continues to actively expand its solar energy sector, aiming to increase the share of renewable energy production and strengthen the country's energy independence. As of today, ...
