

Therefore, this study concentrates on creating a detailed design study for a solar project using LiDAR point clouds. The outcomes will be used to propose the best orientation for solar plants in the ...

In the review, references were used by several authors in this research field, and all studies confirmed Baghdad's willingness to use solar applications such as heating water for home use.

In the present study, researchers examined a solar off-grid-connected photovoltaic system for a family house in the city of Baghdad. The design was created with the help of the "How ...

The goal of this work is to analyze data collected by the Al-Rashidiya meteorological station to predict the performance of solar PV modules (NT-R0E3E-SHARP) in this geographical area.

Renewable types of energy, especially solar energy, have increased rapidly in recent years and have become an important source of power generation in developed and developing countries.

Solar electricity has the highest efficiency amongst all forms of renewable energy. This study examines the monthly grid performance of a hypothetical 100 MWp solar facility linked to the Al ...

This study exhibits the performance assessment of a 5kWp CIGS PV solar system Grid-tied, installed at Al-Mansour Factory/Baghdad-Iraq (latitude 33.3°N, longitude 44.4°E and 41m above the sea level). ...

Many researchers have stipulated that utilizing renewables such as solar and wind energy as energy sources has helped to mitigate greenhouse gas emissions [6]. Solar energy is one of the most ...

With the result of the cost calculations done for the cities, it's found out that photovoltaic solar power panel systems that cost 9628 \$ in Baghdad are good enough to fulfill.
