

Back in 2019, Bentley made waves by introducing the UK's largest solar-powered car port at the Crewe site, a testament to their dedication to sustainable practices.

Discover how Bentley's initiative to build the UK's largest solar-powered car port is revolutionizing the automotive industry's approach to sustainability.

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

They are set over 3.45 hectares of roof space and have a capacity of 5MW. The array generates enough energy to power over 1,200 households and is three times more powerful than the second largest ...

3ti, the leading solar provider in the UK, will oversee the installation of a rooftop-mounted solar array spanning ten buildings, with a capacity of 2.6 MWp. This announcement aligns with ...

When fully operational, the solar panels can generate over 10MW of power that can power 2,370 homes for a year. A decade ago, Bentley installed its first suite of solar panels at the Pyms ...

In 2024, for example, Bentley Singapore installed over 1,200 solar panels to power its showroom. Unused solar energy is exported back to the grid, ensuring zero-carbon electricity consumption.

When fully operational, the solar panels can generate over 10MW of ...

In 2019, the UK's largest solar-powered car port was installed at the Bentley site in Crewe. All electricity used to manufacture Bentley cars is solar, or certified green. The solar panels ...

More than 30,000 solar modules provide electricity 10,000 solar modules was installed at Bentley's Crewe site. The facility has a capacity of 2.7 MW nd includes 1,378 car parking spaces - an area of ...
