

Argentina's largest province has approved its first regulatory framework for collective renewable energy projects, allowing multiple users to share self-consumption and monetise surplus ...

Accelerate the uptake of grid-integrated low-emission resilient community energy in Argentina for implementing the NDC and achieving long-term carbon neutral and resilient development

For a country with the abundant solar resources of Argentina, the lack of PV adoption is cause for concern. The north of Argentina experiences high levels of solar radiation and has the ...

A small town generating its own power, a city school equipping its rooftop with solar panels, and a company building solar water heaters that help to cut energy bills: small-scale ...

With large projects held back by the economic crisis and lack of infrastructure, Argentina seems to see an alternative path towards greater sustainability of its energy matrix in small ...

To achieve our Community Microgrid vision, the Clean Coalition is designing and staging numerous Solar Microgrids at critical community facilities, which will be ready to connect to larger Community ...

The implementation of community microgrids is not solely a technical or economic challenge; it also involves significant social and governance considerations. Meaningful community ...

Summary: Buenos Aires has launched an ambitious energy storage policy to modernize its grid and integrate renewable energy. This article explores the policy's framework, its impact on industries like ...

The Province of Buenos Aires made a historic advance by enabling community distributed generation, allowing neighbors, SMEs, or consortia to partner to produce renewable ...

Buenos Aires offers a range of local experts and companies specializing in renewable energy installations. Consulting with these professionals can provide insights tailored to your specific needs ...

Why We Need Community Microgrids  
The Value-Of-Resilience  
Transitioning Our Energy System  
Key Stakeholders For Community Microgrid Success  
It's time to modernize our energy system and move it into the present. What worked in the past is no longer viable. Our centralized power grid is so last century, as our friends at the World Business Academy explain in this excellent video: The future is here -- in the form of Community Microgrids.
