

Buy solar panels to generate electricity for your home

Should you install solar panels on your home?

The benefits of installing solar panels on your home include energy cost savings, increased home value, cleaner air, and energy independence. While solar panels have a reputation for being expensive, they're actually much cheaper than grid electricity. The greatest hurdle to going solar is the process itself.

Do home solar installations save money?

Home solar installations include more equipment than just solar panels. You don't need to live somewhere warm or with abundant sunshine to save with solar. Most homeowners will save tens of thousands of dollars by going solar. Your electricity bill savings accumulate over decades, not just a few years.

How do solar panels work?

Rail-free mounting keeps panels close to your roof and panel skirts hide hardware and edges from view. Solar panels generate energy from sunlight for you to use in your home. When paired with a Powerwall home battery, you can store your excess energy for use whenever you want.

Why should I get solar panels for my home?

There are a handful of reasons to get solar panels for your home, but the biggest one is energy cost savings. Home solar is simply much cheaper than paying for grid electricity, and can lead to tens - sometimes hundreds - of thousands in savings over the warranty period of the panels.

Learn how to select solar panels that can light the house effectively, covering types, costs, installation, and key factors for reliable home energy.
