

China and European solar and storage leaders met in Düsseldorf, Germany, this week to call for deeper cross-border cooperation as both regions confront record PV additions, rising storage...

Note: Required spread for a two-hour battery project assuming revenues cover costs of just capex of EUR360,000/MWh. Assumes 90% round-trip efficiency, 85% depth of discharge and an average of 1.5 cycles ...

Chinese storage providers aren't just exporting products - they're establishing new operational blueprints that European utilities are scrambling to adopt. With 56.5 GWh of global contracts secured since November 2024 ...

Industry leaders from China and Europe met in Düsseldorf for the China-EU Solar & Energy Storage Industries Dialogue 2025, launching a bilateral storage cooperation platform and aligning on ...

In this exclusive roundtable, we will discuss how the future of the solar and energy storage industries will take shape on an international level.

In December 2025, two large-scale grid-side independent energy storage projects supported by Beijing KeRui were successfully connected to the grid in Inner Mongolia and put into operation: the 500 MW ...

Picture Europe's wind farms high-fiving China's solar arrays across continents. That's essentially what the China-Europe shared energy storage project aims to achieve - creating an energy handshake that ...

China's massive 30-megawatt (MW) flywheel energy storage plant, the Dinglun power station, is now connected to the grid, making it the largest operational flywheel energy storage facility ever built.

A 100MW thermal solar and molten salt energy storage system in Xinjiang, China, is set to be completed and Page 1/4 China-europe solar energy storage project grid-connected by the end of the year, part of a project ...

These flagship projects collectively illustrate Sineng Electric's capability in cross-day and cross-season energy regulation, providing valuable technical references as Europe seeks to scale up its own long ...
