

Market analysts routinely monitor and report the average cost of PV systems and components, but more detail is needed to understand the impact of recent and future technology developments on cost.

U.S. Distributed Solar and Storage Data Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are ...

Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

The average price of solar panels used in distributed generation projects in the US reached US\$0.27/W by the first half of the year.

Solar panel cost by state January, 2026 Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live prices from solar providers near you.

Global polysilicon spot prices fell 22% from mid-January (\$8.70/kg) to late April (\$6.76/kg), approaching the lowest nominal price seen over the past decade. The recent plunge in global module prices ...

Since peaking in August, prices for solar modules for distributed generation (DG) projects such as rooftop, commercial, industrial, and community solar in the United States have ...

This database contains unit cost information for different components that may be used to integrate distributed PV onto distribution systems. The total cost of implementing different upgrades on a given ...

We are pleased to announce the release of the latest edition of Berkeley Lab's Tracking the Sun annual report, describing trends for distributed solar photovoltaic (PV) systems in the United...

Due to limited data availability, we use the Global Price Index series reported by IRENA, based on pvXchange benchmark prices for modules sold in Europe. Historical prices have been ...
