

# Downgrade national standards for photovoltaic panels

What are China's changes to photovoltaic manufacturing standards?

SUN KAIFANG/FOR CHINA DAILY China's Ministry of Industry and Information Technology has announced revisions to photovoltaic manufacturing industry standards, addressing current challenges like businesses' repetitive expansion of low-level production capacity and falling profitability, to promote the PV industry's healthier development.

What's new in China's photovoltaic industry?

[Photo/Xinhua] China's Ministry of Industry and Information Technology announced on Wednesday certain revisions to the previous photovoltaic manufacturing industry standards, raising the minimum proportion of investment that must be funded by shareholders' own capital to 30 percent.

What are the new photovoltaic industry guidelines?

The revised guidelines encourage photovoltaic companies to focus on technological innovation, product quality improvement, and production cost reduction, rather than merely expanding capacity.

What are solar PV end-of-life waste management and recycling regulations?

Table 2. Solar PV end-of-life waste management and recycling regulations in China and the USA. The GB/T 38,785-2020 standard provides technical requirements for recycling thin-film photovoltaic modules and reusing them for building use. Furthermore, China has also established other standards and guidelines for the management of EOL PV waste.

11.1 International Technical Standards for Photovoltaic Technology and Life Cycle Assessment In this section, the main international technical standards regulating photovoltaic ...

Abstract The solar photovoltaic (PV) industry has experienced rapid growth in recent years, resulting in a substantial increase in the amount of end-of-life (EOL) waste generated by these ...

Are photovoltaic solar energy systems safe? The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the ...

On Nov. 28, 2024, China's State Administration for Market Regulations published a recommended national standard that provides general rules for the downcycling of photovoltaic (PV) modules. The ...

Standards available for the energy rating of PV modules in different climatic conditions, but degradation rate and operational lifetime need additional scientific and standardisation work (no ...

China's Ministry of Industry and Information Technology has announced revisions to photovoltaic manufacturing industry standards, addressing current challenges like businesses' ...

There are numerous national and international bodies that set standards for photovoltaics. There are standards

# Downgrade national standards for photovoltaic panels

for nearly every stage of the PV life cycle, including materials and processes used in the ...

An aerial drone photo taken on Sept 8, 2024 shows a partial view of the Shichengzi photovoltaic power station in Hami City, Northwest China's Xinjiang Uygur autonomous region. ...

The international standards for photovoltaic (PV) module safety qualification, IEC 61730 series (61730-1 and 61730-2), were ... anticipated by each category as it would relate to PV systems. ...
