

Appendix 1 to the Order of the Government of the Republic of Tajikistan of November 26, 2025 No. 648 The development program of electric utility sector for 2026-2030 1. General provisions ...

Tajikistan seeks to enhance its energy system resilience by reconnecting to the United Energy System of Central Asia. This effort is supported by large infrastructure projects of common interests, such as ...

Hydropower is the main source of energy in Tajikistan, followed by imported oil, gas and coal. However, Tajikistan's energy sector is prone to supply shocks. Energy policy focuses on providing ...

Tajikistan aims to add up to 1,500 MW of solar and wind capacity over the next two years, targeting renewables to comprise 10 percent of its energy mix by 2030. The country is committed to ...

In his late December 2024 address to parliament, Tajikistan's President Emomali Rakhmon announced the country's goal to eliminate its energy deficit by 2027. This ambitious goal ...

Tajikistan's electricity consumption rose in 2025, driven by population growth, uninterrupted supply to households and industry, expanded capacity connections, and higher billing volumes, even ...

According to the Deputy Minister of Energy and Water Resources of Tajikistan Manouchehr Safarzoda, the document marks a major step toward strengthening national energy ...

Tajikistan's electricity sector is characterised by seasonal surpluses and shortages with limited diversity of energy sources, and the financial challenges of the state-owned electric utility.

To support this transition, Tajikistan must also invest in workforce training and deepen cooperation with international donors. Without a strategic shift in investment and policy, the country ...

It was noted that the draft resolution was developed and presented with the aim of ensuring energy security and the efficient use of electricity, which is one of the key goals of the ...
