New Drivers for Campus Microgrids: Resiliency, Community, ...
Microgrid Knowledge partnered with Hitachi in writing this paper to examine this new microgrid trend and show colleges and universities the initial steps to become part of the movement.

This research paper introduces a model for an electric vehicle (EV) charging station incorporated within a direct current (DC) microgrid, specifically within the context of a smart university environment.

Microgrids on campuses face challenges in the instability of power production due to meteorological conditions, as the output of renewable sources such as solar and wind power relies entirely ...

Gallaudet's microgrid combines multiple forms of distributed energy resources, including hundreds of solar panels spread across seven rooftops; any energy the school doesn't use immediately can be stored ...

Microgrid Knowledge prepared this report, in partnership with Siemens, to help college and university decision-makers better understand microgrids and the benefits they provide.
