

To ensure grid stability, Riga is investing in smart grid technology and energy storage solutions. These technologies help balance the load on the grid and store excess energy generated ...

As cities like Riga embrace renewable energy solutions, photovoltaic charging piles with integrated energy storage are emerging as a game-changer for urban infrastructure. This article explores how ...

A major project co-financed by the European Climate, Infrastructure and Environment Executive Agency (CINEA) has been successfully completed at Riga Airport.

The development and integration of autonomous power sources (APSs) for electric vehicle (EV) charging infrastructure are essential for reducing dependency on centralized power grids and ...

In Latvia's bustling capital, uninterruptible power supply vehicles are becoming essential assets for industries requiring 24/7 electricity stability. From data centers to healthcare facilities, these mobile ...

Modern BMS solutions in Riga's installations achieve 99.97% cell monitoring accuracy, extending battery lifecycles beyond 8,000 cycles. That's like charging your phone three times daily for seven years ...

Swedish tech company Anodox Energy Systems has announced plans to produce electric vehicle batteries in Latvia, with the first factory in the Port of Riga expected to be operational by December ...

As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading this charge [8]. This isn't just about keeping smartphones charged; it's about rewriting Europe's energy rules.

What is a lithium battery energy storage container system?lithium battery energy storage container system mainly used in large-scale commercial and industrial energy storage applications. At the ...

Providers of commercial and residential energy storage solutions, including supercharging stations and community charging hubs. By leveraging Anari's cutting-edge technology, partners can deliver ...
