

This study investigates the integration of renewable energy systems and energy storage into a microgrid for the Port of Cape Town to address energy efficiency and resilience challenges amid port expansion.

Solid-state energy storage systems (SSESS) with fireproof designs are rewriting the rules of microgrid safety, combining NASA-level engineering with "grandma's cookie jar" reliability.

The microgrid developed under HyTrA is perfectly adapted to the specific requirements of the African market and boasts a lifespan of over 60,000 operating hours (more than 10 years), ...

Solar & Storage Live is Cape Town's largest renewable energy exhibition that celebrates the technologies at the forefront of the transition to a greener, smarter, more decentralised energy system.

Located in the Northern Cape, this groundbreaking project is set to become Africa's largest standalone battery energy storage system. With a capacity of 153 MW, it will play a vital role in ...

City of Cape Town, which is in the process of procuring up to 200 MW of renewable energy from independent power producers (IPPs), expects to initiate a utility-scale battery energy storage ...

Construction at the Red Sands battery energy storage system (Bess) plant in South Africa's Northern Cape is imminent following financial close on 1 July. Once completed, the project developers said the ...

ATC has signed a multimillion-dollar lithium-ion battery bulk purchase agreement with Polarium, which will support a new energy storage manufacturing plant in South Africa while securing lithium-powered ...

We're testing two mobile battery storage systems, which provide backup power to customers when crews are working on repairs that would otherwise require a power outage. We are also charging one ...

The launch of a R25-million solar energy, lithium-ion battery storage microgrid on Robben Island - a World Heritage Site in Table Bay, Cape Town - that until recently relied on ...
