

The American Society of Civil Engineers (ASCE) supports the maintenance, development, reliability, and resiliency improvements of energy storage systems (ESS) to improve the reliability of the United States" ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

This paper provides a comprehensive review of ESS policies worldwide, identifying the different goals, objectives and the expected outcomes. It discusses the benefits of having such policies, the impact ...

All of the states with a storage policy in place have a renewable portfolio standard or a nonbinding renewable energy goal.

CEG provides information, technical guidance, policy and regulatory design support, and independent analysis to help break down the barriers to energy storage deployment and advance the ...

Today, the U.S. Department of Energy released its draft Energy Storage Strategy and Roadmap.

Policymakers are beginning to see the potential for energy storage to help achieve ambitious clean energy goals to address climate change, particularly in states that are adopting plans to achieve 100 percent renewables ...

Search for any state policy data here. The energy storage policy landscape in the U.S. continues to evolve, both at the federal level and within state regulatory proceedings.

Long-duration energy storage (LDES) will play an increasingly important role in decarbonizing the power sector as more variable renewable energy is added to the electric power grid. LDES is defined by the U.S. Depart ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.
