

The Institute for Data, Energy, and Sustainability (IDEaS) is dedicated to using data-driven and evidence-based approaches in analyzing the systemic changes associated with the digital and green ...

New energy storage systems of different technologies are also important for a sustainable energy system in Austria and must be developed in cooperation between research and industry and ...

The Vienna University of Technology (TU Wien) opened the Christian Doppler Laboratory at the beginning of this week. Under the leadership of Alexander Opitz (pictured), an interdisciplinary ...

Researchers at the Vienna University of Technology are developing thermochemical storage systems capable of storing energy for months, years, or even decades with minimal loss.

Innovative storage technologies and new fields of application for the use of energy storage systems are being researched and demonstrated in practical operations as part of national and international ...

Everything about: studies, research, partnerships, services.

Green Energy Lab is a research initiative for sustainable energy solutions. With the core regions of Vienna, Lower Austria, Burgenland and Styria, Green Energy Lab has a test market of five ...

Attend this hybrid event to explore the latest innovations in renewable energy technologies, energy storage solutions, and sustainable practices. Earn CPD points and publish your research in the ...

Based on this analysis, a detailed technical concept for the first pilot ATES in the Vienna area will be developed, considering the utilization of existing hydrocarbon wells and new drilled wells. The ...

With decades of experience in research and development and hundreds of successfully completed projects, we are proud to be a leading hydrogen research centre. We invite you to meet ...
