

Batteries Europe, launched in 2019, is the technology and innovation platform of the European Battery Alliance, run jointly by the Commission and stakeholders in the battery industry.

The top five integrators, Fluence, Tesla, W&#228;rtsil&#228;, BYD, and Hitachi Energy, controlled roughly 48% of contracted gigawatt-hours in 2025, positioning the European Battery Energy Storage ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total ...

The European Energy Storage Market Monitor (EMMES) updates the analysis of the European energy storage market (including household storage, industrial storage and pre-metre storage) and forecasts ...

Executive summary Batteries are an essential part of the global energy system today and the fastest growing energy technology on the market Battery storage in the power sector was the fastest ...

Explore 2025 BESS projects across Europe, from Germany's Na-ion advancements to France and Spain's renewable energy storage initiatives.

In this series of articles Coen Hutters, Pablo Ruiz, and Sanne de Boer explore the key factors shaping BESS investment models in Germany, the UK, France, Spain, Italy, and the Netherlands.

New analysis reveals another year of record installations for European battery storage, despite slower year-on-year growth, according to the latest European Market Outlook for Battery ...

Volta's annual report now stretches to 750 pages, diving deep into many technical areas, along with the usual focus on battery energy storage systems (BESS).
