

You know, when people talk about European energy storage, Germany and Sweden usually steal the spotlight. But here's the thing - Finland's quietly been building a world-class battery ecosystem that's ...

The status of these energy storage technologies in Finland will be discussed in more detail in the next sub-sections, giving a better understanding of the current and potential role of these ...

This piece targets renewable energy investors, tech enthusiasts, and policymakers hungry for actionable insights. Think of it as a backstage pass to how Finland is quietly becoming the Battery ...

From advanced batteries to smart software, the Cactos system is designed and built in Finland. It works quietly in the background, optimizing your energy use without you having to do a thing.

Nala Renewables has entered into an agreement to acquire a ready-to-build battery energy storage (BESS) portfolio in Finland from Fu-Gen AG.

The Federal Institute for Materials Research and Testing (BAM), the Helmholtz-Zentrum Berlin (HZB), and Humboldt University of Berlin (HU) have signed a memorandum of understanding ...

SEB Nordic Energy's portfolio company, Locus Energy collaborates with Ingrid Capacity to build the largest battery energy storage project in Finland, contributing 70 MW/140 MWh battery ...

The energy storage facility (BESS), owned by Taaleri Energia 's SolarWind III fund and delivered by Merus Power, highlights the importance of flexibility and innovation in the Finnish power ...

Construction is scheduled to begin in autumn 2025, with commercial operations expected in 2026. The BESS will play a critical role in balancing electricity supply and demand, mitigating price ...

Once commissioned in early 2025, the system will be one of the first large-scale BESS operating in Finland, according to the statement. Helen noted its investment in the project is aligned ...
