

Foreign media comments on solar power generation

China is moving away from fossil fuels while the U.S. is doubling down. Experts say this will have consequences for the climate and these countries' economies. NPR sent two ...

While Western media often paints China as the world's coal-guzzling giant, a different energy narrative is unfolding. Imagine this: By 2023, China's solar capacity alone could power all UK households 18 ...

Solar power enjoys a strong lead in pushing renewables development on. Solar panels accounted for about 80 percent of the global growth in renewable energy over the past five years, the ...

It examines the current state of solar power and related academic solar energy research in different countries, aiming to provide valuable guidance for researchers, designers, and policymakers ...

Federal agencies are delaying approvals for renewable energy projects on both federal land and private property at a time when electricity demand is going up. Energy experts said governors and...

Stay up to date on the latest Solar power news coverage from AP News.

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication...

U.S. President Donald Trump may have spurned solar power, but that has done little to slow the solar revolution that is sweeping nearly every other corner of the world, from Pakistan to...

The reported discovery of "rogue communication devices" in Chinese-exported solar inverters spurred new scrutiny of Chinese imports and of the security of the domestic electric grid.

Renewable electricity generation continues to grow rapidly worldwide, despite recent U.S. policy shifts, with global capacity expected to more than double by 2030, according to the ...
