

Deutsche ReGas GmbH & Co. KGaA Other unavailability Unplanned Uniper Energy Storage GmbH Injection unavailability Unplanned OLT Offshore LNG Toscana S.p.A

European gas storage dropped to 44% of total capacity on January 26, according to European energy data platform AGSI. That is the lowest level for this time of the year since 2022, ...

Databases LNG Investment Database, LNG New Services Inventory, LNG List of Services, LNG Database, Storage Database

The GIE Storage Map provides comprehensive information on existing and under construction underground gas storage facilities in Europe, including working gas volume, withdrawal ...

The dashboard includes maps and charts of daily gas flows in Europe, and the evolution of gas storage stock level compared to ENTSOG seasonal supply ...

Decarbonisation in Central-Eastern and South-Eastern Europe: How gas infrastructure can contribute to meet EU's long-term decarbonisation objectives ... 21 April 2021 The European gas infrastructure ...

The System Capacity Map demonstrates the resilience and continued development of Europe's gas infrastructure, encompassing transmission pipelines, underground storages, and LNG ...

As of February 2, 2026, the European continent finds itself grappling with a familiar and chilling specter: an energy crunch that has seen natural gas storage levels plummet to their lowest ...

Information regarding the gas storage fill rate and LNG capacities shown were obtained from the GIE AGSI and ALSI platforms respectively. This map is published jointly with ENTSOG.

As of April 1, 2024, natural gas storage facilities in Europe were 59% full--the highest percentage on record for the end of a heating season (November 1 through March 31)--according to ...

This chart shows the gas storage capacity of EU member states and the filling level of underground gas reserves.

According to Gas Infrastructure Europe, as of 27 September, the European average stands at 82.32 per cent, and only seven countries have already exceeded the 90 per cent threshold.

Gas Storage Europe (GSE) represents the interests of 31 Storage System Operators with around 102 storage

sites in 20 countries in Europe, representing approximately 91 BCM, i.e. 84% of EU technical ...

AGSI and ALSI Transparency Platforms GIE's AGSI and ALSI Transparency Platforms provide inventory reporting in daily resolution for underground gas storages and large-scale LNG terminals.

European gas storage has dropped to one of its lowest levels in years Daily gas storage levels (terawatt hours) Minimum-maximum range since 2021 Source: Gas Infrastructure Europe

The Storage Database is the base of the Storage Map. It shows the operational data such as working gas volume, injection and withdrawal capacities of storage facilities as well as the under construction ...
