

China has achieved a groundbreaking advancement in renewable energy technology with the recent inauguration of the world's first solar-thermal power plant, which employs a dual-tower ...

In the windswept Gobi Desert near Hami, Xinjiang, something futuristic is rising... a 220m molten salt tower on the shores of Naomao Lake. Surrounded by 14,500 heliostats (basically sun ...

China's Gobi Desert is home to a groundbreaking solar power station, a world-first design that slashes costs and significantly boosts energy efficiency.

This new plant is designed to be cheaper and more efficient than traditional solar thermal power stations, making it a major step forward for renewable energy. The power station is located in ...

The Mengxi Blue Ocean PV Power Plant Project in Gobi desert is China's largest single site solar power plant.

China just connected its largest single-capacity solar farm built on a former coal mining area, which is in the Gobi Desert, to the grid.

In a first, China has switched on a solar thermal power station in the Gobi Desert, a project described as a more cost-effective and efficient use of the technology, with the potential to be scaled ...

China has launched the world's first dual-tower solar thermal power plant in the Gobi Desert, built by China Three Gorges Corporation to power 5 lakh homes.

A groundbreaking solar thermal power plant in Xinjiang's Gobi Desert showcases China's renewable energy ambitions, combining cutting-edge technology with sustainable development goals.
