

With increasing climate challenges and growing energy demands, Guyana is turning to emergency energy storage systems to ensure grid stability and disaster preparedness.

As a key component of Guyana's landmark GtE initiative, the BESS will enhance the project's efficiency and reliability; helping to stabilise the national grid, reduce carbon emissions and ...

With our team working on-site around the clock, focused on meeting international quality standards and the arrival of the BESS, the project moves one step closer to completion, ensuring ...

Guyana's project isn't just about storing energy--it's about harnessing chaos. With 87% forest cover and rivers that behave like moody teenagers (unpredictable and full of energy), the ...

As Guyana positions itself as a Caribbean energy leader, this EPC project demonstrates how electrochemical storage can transform national grids while supporting sustainable development goals.

Designed to respond instantaneously, BESS provides "critical" backup power to protect the integrity of the electrical grid and maintain operational stability in the event of turbine failure.

With our team working on-site around the clock, focused on meeting international quality standards and the arrival of the BESS, the project moves one step closer to ...

After a period of dedicated efforts, on January 27, 2025, the Wakenaam Diesel and BESS Storage Project was officially completed.

The Gas-to-Energy project, originally scheduled for completion by the end of 2024, has been delayed. Prime Minister Mark Phillips said in May that the facility is now expected to be ...

The Guyana Energy Agency continues to support national efforts in transforming the country's sustainable low-carbon pathway and the energy sector, as it contributes to providing cleaner, ...
