

What is a circuit breaker?

A circuit breaker is an automatic electrical switch designed to protect electrical circuits from damage caused by overload or short circuits. It interrupts the flow of electricity when a fault is detected, preventing equipment damage and ensuring the safety of your installation and users. Types of Circuit Breakers Available at PT. Chint Indonesia

What are the different types of circuit breakers?

1. Air Circuit Breaker (ACB) Designed for high-capacity electrical distribution systems. 2. Miniature Circuit Breaker (MCB) Perfect protection solution for residential and light commercial use. 3. Molded Case Circuit Breaker (MCCB) Provides protection for medium to high current electrical systems.
