

How is the development of Andorra's telecommunications industry

Does Andorra have a telecommunications market?

Andorra does not have a big enough market for more than one telecommunications company. For many small countries such as Monaco, San Marino and Gibraltar it is very hard to open the telecommunication market. Monaco has tried but nobody came into it. There is still only Monaco Telecom.

Why is Andorra Telecom implementing a special mechanism?

A special mechanism has to be implemented to keep the rights of the consumers safe. According to Andorran law, Andorra Telecom has to provide 100 Mb per second to any household at the same price and the government has to approve the tariffs for the residential market and to strengthen the consumer's position.

When did Andorra Telecom become a SAU?

Andorra Telecom became a SAU on the 27th of November 2014. The Consell General, our parliament, unanimously approved the new law that upholds the public company's historical status. All the parties voted recently that Andorra Telecom will continue as the public operator that has exclusivity over the telecommunications services in Andorra. Why?

What is Andorra Telecom Law?

According to Andorran law, Andorra Telecom has to provide 100 Mb per second to any household at the same price and the government has to approve the tariffs for the residential market and to strengthen the consumer's position. It is working on a draft regulator of telecommunications law to introduce in parliament.
