SupercapacitorsCharging ElectronicsSolar PanelDischarging ElectronicsOtherThe heart of this device consists of 6 supercapacitors. I decided to use D-cell sized supercaps, because they are easy to find, and cheap to buy. They claim 500F 2.7V each. 6 is good, because they fit in my small box, balancing between capacity and device size (and money of course). Let's make some calculations, for supercapacitors: $6 * 500F = \dots$ See more on instructables chrisnell [PDF]Supercapacitor communication base station photovoltaic power ...Can supercapacitors prevent grid system frequency and voltage fluctuations?
