

India's energy storage system (ESS) market grew from 122GWh to 224GWh cumulative, a 1.8X times increase year-over-year (YoY), with a total of 60GWh projects under execution, 80GWh ...

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, ...

In this blog, we explore the top 7 biggest battery energy storage projects in India in 2025, highlighting their capacities, technologies, and strategic importance in supporting grid stability and renewable ...

India is rapidly emerging as a global hub for energy storage, driven by strong government support and a vision to achieve climate resilience and grid stability.

India Energy Storage Alliance (IESA) is a leading industry alliance focused on the development of advanced energy storage, green hydrogen, and e-mobility techno

With IFC's support, we are proud to lead the deployment of one of India's first and largest BESS assets in Gujarat. This project represents a strategic milestone in building next-generation ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about ...

An IESA statement on the study stated that India's energy storage sector is poised for a transformative breakout in 2026, with battery energy storage capacity addition set to surge nearly 10 ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by ...
