

The government of Indonesia has launched a programme that aims to build 100GW of solar PV and 320GWh BESS in the coming years.

The Indonesian and Australian leaders have signed a security treaty that both governments say will deepen ties between the often-testy neighbors.

In 1997, The World Factbook went digital and debuted to a worldwide audience on CIA.gov, where it garnered millions of views each year. The World Factbook appealed to researchers, news ...

Institute for Essential Services Reform (IESR), a leading energy and environment think tank, has released two new studies on solar energy development and an assessment of energy storage systems in ...

Indonesia, officially the Republic of Indonesia (Bahasa Indonesia: Republik Indonesia), is a vast nation consisting of more than 18,000 islands in the South East Asian Archipelago, and is the world's ...

These solar-plus-storage minigrids are set to be installed in 80,000 villages across Indonesia and will be managed and operated by village cooperative Merah Putih. The initiative also includes plans for 20 ...

Immerse yourself in Indonesia's vibrant culture through its unique handicrafts, rich traditions, and mouth-watering culinary delights. Indonesia is home to extraordinary natural wonders, and Komodo National ...

Indonesia is an independent republic consisting of more than 17,500 islands spread over 3,400 miles along the Equator. The main islands are Java, Sumatra, Bali, Kalimantan (Borneo), ...

Operated by the village cooperative Merah Putih, these solar-plus-storage mini grids aim to provide affordable, reliable power while reducing dependence on costly diesel generators. The government ...

Both these projects are a step towards increasing Indonesia's share of renewable energy from 15% to 23% by 2030 and aligning with the ambitious goal of reaching net zero by 2060. These projects were possible due to ...

The programme will consist of 80GW of solar PV plants and 320GWh of battery energy storage systems (BESS) across 80,000 villages. The projects will comprise 1MW solar PV capacity and 4MWh ...

This article looks at renewable energy laws in Indonesia, covering the market, foreign investment, consents and permits, recent developments, and more.

Indonesia targets to achieve up to 108.7 GW of solar capacity under its 2025-2060 National Energy Policy (RUKN). This policy aims for new and renewable energy with storage to account for close to ...

The initiative foresees building 100 GW of solar energy and 320 GWh of battery storage across 80,000 villages and centralized solar power plants. This bold target will require a step change in Indonesia's ...

Comprising over 17,000 islands, including Sumatra, Java, Sulawesi, and parts of Borneo and New Guinea, Indonesia is the world's largest archipelagic state and the 14th-largest country by area, at ...

These solar-plus-storage mini grids are set to be installed in 80,000 villages across Indonesia and will be managed and operated by village cooperative Merah Putih. The initiative also...
