

Investment in French energy storage projects

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

How much energy storage capacity does France have in 2022?

France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

How will TagEnergy and Banque des territoires support battery projects in France?

Paris, April 8, 2025 - TagEnergy, a leader in clean energy production behind construction of the largest battery energy storage platform in France, and Banque des Territoires, announce a three-year investment partnership agreement to support the financing of several battery projects in France.

What is TagEnergy doing in France?

The first project in this partnership is the largest French stationary storage project (240MW /480MWh) located in Cernay-l'Évêque-Reims in the Marne region, in which Banque des Territoires has just acquired 49% of the capital. TagEnergy is accelerating the deployment of its solar development and storage activities in line with its expansion strategy.

This report provides a comprehensive analysis of utility-scale battery storage investment opportunities across Germany, France, and Spain, which collectively will represent nearly 25% of ...
