

Should you install solar?

“It depends on what is motivating the household to make the decision to [install] solar,” Becca Jones-Albertus, director of the US Department of Energy Solar Energy Technologies Office, told CNET. If you're looking to be 100% energy independent or live off the grid, solar could be a good way to reach those goals.

Are solar panels a good idea?

The information has been collected by NerdWallet and has not been provided or reviewed by the card issuer. A solar panel is a device that helps convert sunlight into electricity. The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits.

Can you get a loan to install solar panels?

You may be able to get a loan to help pay for the costs of installing solar panels. Panels start working immediately, saving you money as soon as they're installed. Cons: Solar panel installation can cost tens of thousands of dollars, and any rebates or incentives can take months to arrive. Panels require professional installation.

Are solar panels a good option for home improvement projects?

As with any home improvement project, there are benefits and drawbacks to installing solar panels. Pros: The energy produced by your solar system is free, and if your utility uses net metering, it credits you for any excess electricity that is added to the grid, helping you to break even more quickly on the project's cost.

Should repairs become necessary, these often involve significant costs. Things to Consider Before Installing Solar Panels Before committing to solar energy, evaluate whether your home is a good fit ...
