

Is there an export tariff on energy storage batteries from Romania

Why is Romania removing double taxation on energy storage?

Romania's elimination of double taxation on energy storage is more than a technical adjustment--it's a strategic inflection point. By aligning its regulatory framework with market realities, the country is removing one of the last structural barriers to widespread BESS adoption.

Why is battery storage important in Romania?

This policy shift aligns Romania more closely with EU energy goals, where battery storage is increasingly recognized as an enabler of grid flexibility, renewable integration, and energy security.

Why has Romania overhauled a key regulatory barrier preventing energy storage?

In a decisive move to support its clean energy transition, Romania has overhauled a key regulatory barrier holding back investment in energy storage.

Is Romania a hotspot for battery storage in Eastern Europe?

It also positions Romania as an emerging hotspot for battery storage investment in Eastern Europe, alongside EU peers like Greece and Poland, who are also reforming their grid regulations. For the European energy storage ecosystem, Romania's move is strategically significant.

Under the new "Order on the Methodological Norms", electricity charged from the grid and subsequently discharged back onto it is exempt from several key regulated tariffs in Romania.

Romania's National Energy Regulatory Authority (ANRE) has taken aim at accelerating energy storage solution deployment by eliminating the double taxation on stored electricity. This ...

The National Energy Regulatory Authority of Romania has approved a regulation eliminating double taxation of energy storage, to allow for faster deployment of solutions for storing ...

The National Energy Regulatory Authority (ANRE) regulates Romania's energy sector. Here is a local meeting it held a few months ago, with president George Niculescu sat just left of ...

Romania has taken a decisive regulatory step in favor of its clean energy transition, removing the double taxation that hindered the development of battery energy storage systems. The ...

This double charging represented a significant obstacle to the development of electricity storage capacities, and seriously affected investment in energy-storage infrastructure and the viability ...

One of the most important legislative changes addressed by GEO 134/2024 is the elimination of double taxation of stored energy. Until the enactment of the new GEO, stored energy was subject to taxes ...

Romania eliminates double taxation on battery energy storage systems to attract investors and accelerate

Is there an export tariff on energy storage batteries from Romania

renewable integration across the national grid.

Importantly, network use-of-system charges are recovered differently: - The transmission tariff is split into two components: the extraction tariff, levied on users when they import electricity from ...

On July 8th, Romania's Energy Regulatory Authority (ANRE) officially approved new regulations abolishing double taxation on battery energy storage systems (BESS). The move aims to ...
