

Israel's battery storage market is shifting from concept to execution. With strong policy backing, major utility-scale projects underway, and a vibrant innovation ecosystem, the country is...

Israel has awarded contracts for 1.5 GW of high-voltage battery storage capacity across three regions, marking a significant milestone in the country's energy transition.

Advanced Battery Chemistry: Israeli researchers are developing novel battery compositions that dramatically increase energy density while reducing production costs. These ...

Under the partnership, El-Mor will design and construct battery energy storage systems (BESS) and related infrastructure for multiple projects totaling 1.5GWh capacity and 300MW power ...

The Israeli Electricity Authority (IEA) has awarded contracts for 1.5 GW of high-voltage battery storage across 11 projects in a recent tender. The awarded facilities will be developed in ...

Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the construction of systems that can store ...

HiTHIUM and El-Mor sign a strategic agreement for 1.5GWh of BESS projects in Israel, featuring the region's largest PV+BESS installation to support grid stability.

HiTHIUM's energy storage system offers an ideal alternative energy source, reducing electricity costs and keeping essential lighting and appliances running during outages, thereby improving household ...

Built with cutting-edge lithium-ion technology, this battery ensures efficient energy storage, long lifespan, and seamless integration with renewable energy systems.

As the importance of energy storage for grid stability grows, enlight is at the forefront of the industry with our expertise in both standalone storage projects and Solar-plus-storage projects.
