

The Battery Runtime Calculator is an indispensable tool for anyone using batteries for power supply, be it in RVs, boats, off-grid systems, or even in everyday electronics. This calculator ...

All battery estimated time remaining is based on Manufacturer estimated amp draw. Operating times may vary based on settings, conditions, installation and factors.

Simply enter your battery's amp-hours, charge rate, or power load in watts, and adjust the state of charge or depth of discharge to see real-time results.

Calculate the optimal lithium battery bank size for your energy storage needs. Design LiFePO4 and Li-ion battery systems for solar, RV, marine, and off-grid applications with professional-grade ...

Compare your lead acid or AGM bank to LiFePO4, size your new lithium leisure battery with our calculator, and follow a full buying guide for boats and campervans in the UK.

Estimate lithium battery capacity (kWh & Ah) for your solar system. Defaults suit LiFePO4 batteries.

Calculate battery run time for 12V, 24V, and 48V batteries based on battery capacity & power consumption.

Ready to make the switch and install lithium batteries in your RV, van, overland rig, marine vessel, or off-grid property ... but you're not sure exactly what you need? Our Lithium Battery Calculator is here to ...

Calculate the perfect leisure battery size for your campervan. Use our quick Leisure Battery Size Calculator for accurate results tailored to your needs!

Use our lithium battery runtime (life) calculator to find out how long your lithium (LiFePO4, Lipo, Lithium Iron Phosphate) battery will last running a load.
