

Battery storage represents more than a technical upgrade for Mexico--it is a strategic opportunity to build a more resilient, efficient, and sustainable energy system. By integrating BESS ...

The Mexican government has announced the approval of 20 private renewable generation projects with a combined installed capacity of 3,320 MW and 1,488 MW of energy ...

Hybrid solar-plus-storage systems and electromobility are shaping Mexico's renewable energy transformation, says Keymex Energy's Iván Aranda.

Mexico has published the results of the 2025 Private Power Generation Projects Call, awarding more than 3 GW of renewable energy capacity and 1,257.4 MW of battery energy storage ...

Mexico's new regulation mandating battery systems for solar and wind projects positions it as a model for energy storage integration in Latin America, according to a new report.

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...

Mexico has announced 20 green energy projects coming to 11 states, part of a push to increase the country's power generation capacity.

In summary, electrical energy storage in Mexico and other Latin American countries is in a phase of growth and development. The implementation of energy storage systems is essential to ...

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid stability, private investment, and the future of energy ...

Mexico's energy sector has unveiled a groundbreaking policy, stirring up the global energy storage market and introducing new variables to its development path. Recently, the Mexican ...
