

Additionally, we develop a two-stage stochastic programming extension of an existing microgrid design and dispatch optimization model to obtain uncertainty-informed and climate-resilient ...

The distribution network, however, is usually ignored. In this paper, a comprehensive dispatching optimization method is proposed to lower the total operation cost of microgrid and distribution ...

Microgrid distribution optimization and dispatching

It explores the integration of hybrid renewable energy sources into a microgrid (MG) and proposes an energy dispatch strategy for MGs operating in both grid-connected and standalone modes.

The optimization dispatching problem of regional distribution network (DN) interconnection with microgrid (MG) is studied in this paper. By installing flexib...
