

On the morning of Sep. 29, construction officially began on the large-scale new energy base in the central and northern areas of the Kubuqi Desert, Inner Mongolia, China. This project ...

ADB has been engaged by the Government of Mongolia to provide transaction advisory services for the Stable Solar Energy in Mongolia Project, which aims to develop about 115 ...

The official vowed to better coordinate new energy development and sand control by accelerating the construction of centralized solar power plants and grid facilities in deserts and ...

The Mongolian government has ambitious plans to further develop the Gobi Desert's renewable energy potential, with several more wind and solar projects already in the pipeline. ...

This marks the first project among Inner Mongolia's four large-scale wind and solar energy bases in desert areas to achieve a combined 2 GW grid connection. It is also the first project ...

Inner Mongolia's innovative solar-desert control project combats sand expansion while generating clean energy and boosting local economies, offering a model for arid regions worldwide.

The panels provide shade, cut groundwater evaporation and reduce wind speeds, all of which support plant growth, said Hong Guangyu, a researcher with the Academy of Forestry ...

In the windswept deserts of northern China, a quiet revolution is underway. Once defined by arid wastelands and ecological degradation, the Kubuqi and Ulan Buh deserts in Inner Mongolia ...

An aerial drone photo taken on June 7, 2025 shows a photovoltaic project in Kubuqi Desert in north China's Inner Mongolia Autonomous Region. In recent years, Inner Mongolia has ...

Discover Inner Mongolia's massive new wind-solar renewable energy project in the Kubuqi Desert, set to power the Beijing-Tianjin-Hebei region with 14 billion kWh annually.
