

With high module efficiency (23.0%), robust 1500 V DC design, and double 2.0 mm glass construction, it delivers excellent energy yield, lower LCOE, and long-term reliability for commercial and large ...

The Higon N-type Bifacial Half-cell Module can reach power output up to 600W. N-type material has zero LID/LeTID risk, and make modules to be higher reliable, higher bifaciality, higher efficiency, lower ...

Znshine Solar's Bifacial PV modules.

Featuring advanced 16-busbar (16BB) half-cell technology and a durable double-glass bifacial design, this module delivers higher energy yield, long-term reliability, and lower levelized cost of electricity ...

Unlock superior solar performance with the JA Solar 605W N-Type Bifacial Double Glass Solar Panel. This cutting-edge module leverages advanced N-type cell technology and an innovative bifacial ...

High-efficiency ZNShine 440W N-Type TOPCon bifacial double-glass solar panel (ZXM7-UHLDD108). 22.5% efficiency with 12-year product & 30-year performance warranty.

Designed to deliver high efficiency through N-type TOPCon cell technology, this module captures sunlight on both sides, optimizing energy production even in reflective and low-light environments.

Nominal bi-facial module gain coefficient can run from 5% to 30% or more, depending on the installation height and the amount of indirect irradiance. It is recommended to design the electrical circuits with ...

ZERO LID (Light Induced Degradation) N-type solar cell has no LID naturally which can increase power generation.

The N-type double glass bifacial modules optimize light absorption on both sides, boosting energy generation. The half-cell configuration reduces hot spots and mechanical stress, while also ...
