

During the recent surge in solar PV installations, the Nordic countries - Sweden, Norway, Finland, and Denmark - have increasingly embraced solar PV technology, defying their northern geographical ...

In the report we present our perspective on the overall trajectory of the Nordic power system, which is undergoing significant changes with the expansion of renewables, electrification and ...

Discover the Nordic grid system's intricacies and seize solar prospects across Norway, Sweden, Denmark, and Finland in this comprehensive guide.

The Nordics are increasingly adding solar to their renewable mix. We explore their solar energy strategy and share the figures that prove their success.

We develop, construct, and operate utility-scale solar parks across Europe on our mission to make everyone benefit from solar energy. As we pursue this mission, our vision is to emerge as one of the ...

In Denmark, wind power is the dominant electricity source, accounting for close to 60% of electricity generation in recent years, data from Energistyrelsen shows, with solar growing quickly. ...

The report communicates our shared perspective on key development trends in the power system and strategies to address emerging challenges. It also provides a status update on ongoing and planned ...

This project follows Sungrow's recent deployment of a 60 MWh battery energy storage system in Simo together with FRV AmpTank joint venture, further strengthening the company's ...

The Nordic region is experiencing a surge in fossil free electricity demand, with Sweden and Finland leading the way in solar power expansion. While the Nordics are known for their strong commitment ...

With record-breaking generation and growing investor confidence, Nordic solar is redefining what's possible for clean energy in colder climates.
