

New energy battery cabinet aluminum profile

All of our engineers are with many years of experience in the deep processing of aluminum profiles. The accuracy of aluminum products can be controlled within 0.01mm.

Our company is the Chinese leading supplier of extruded, machined and surface finished aluminum extrusions profiles. We possess 28 sets of extruders - The biggest is 5500MT, with the production ...

The advanced reinforced aluminum sheet design is aimed at promoting the aluminum housing for mass production of electric vehicles worldwide, and the extruded aluminum solution minimizes the energy ...

With the rapid development of new energy vehicles, we have developed a variety of high-performance new energy battery pack aluminum alloy profiles with automobile manufacturers.

Made from strong and weather-resistant aluminum, these battery enclosures help to provide a storage component to help protect your battery (ies) from the elements and keep electrical components dry.

Electric vehicles and battery systems often require a combination of unique material properties for optimized performance. Our network of extrusion presses can deliver the lightweight, ...

Custom aluminum extrusions are used to create robust and corrosion-resistant battery enclosures, which are critical in maintaining the longevity and reliability of energy storage systems.

This aluminum lithium battery storage cabinet, designed to protect and expand with your growing energy storage needs. It is an efficient energy storage solution that can maximize your space utilization with ...

Equipped with various equipment and machines, we are able to cut products into required sizes according to customer requirements and provide aluminum building material production equipment, ...

Through precise extrusion forming processes, aluminum profiles can be crafted into complex yet robust battery casing structures, effectively resisting external impacts and ...
