

The project aims to enable the widespread implementation of green transport and the vehicle-to-everything technology, by providing technical solutions, a common legislative framework, business ...

Discover how cutting-edge energy storage solutions and advanced battery pump systems are transforming the automotive industry in the Nordic region.

The Nivala battery storage project marks SEB Nordic Energy's second significant investment in Finland in a short time. It follows a 125 GWh wind portfolio comprising 13 wind turbines ...

Rising peak loads from fast charging and electrification are forcing grid operators and site owners across Northern Europe to look for alternatives to costly grid reinforcements, and Nordic ...

Whether you are looking for an energy storage system to power your base camp or a battery solution to support your field operations, we have the expertise and technology to provide the optimal solution ...

This article explores the Nordic energy storage market's unique opportunities, technological innovations, and practical applications for commercial and industrial users.

Norwegian technology company enabling electrification where the power grid reaches its limits. Battery Energy Storage Systems, FCR services, and intelligent charging solutions.

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary services to help balance ...

As the world races toward decarbonization, Sweden's new energy storage technology is turning heads globally, blending Nordic pragmatism with breakthroughs that even Elon Musk might ...

Energy storage, and in particular batteries, offer a flexible and scalable solution. By charging when electricity is abundant (for instance, during windy nights) and discharging during ...
