

Discover the Nordic grid system's intricacies and seize solar prospects across Norway, Sweden, Denmark, and Finland in this comprehensive guide.

But could solar power offer a green alternative? Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to ...

Norway's rooftops may hold the key to a greener future. A new study reveals the country's buildings could generate vast amounts of solar power--enough to transform its energy landscape. ...

Norwegian renewable energy company Alotta has signed a contract with Norwegian fish farmer Emilsen Fisk to deploy one of its floating solar energy solutions at the farm's site at...

The potential is large, but it will only be unlocked with favourable framework conditions. This article analyses how Norway's regulatory landscape for solar energy is changing rapidly.

Norway's strategy aims to integrate solar energy into a diversified renewable portfolio, where it complements the nation's vast wind and hydropower resources. By increasing the share of ...

In this report, we explore the conditions for Norway to engage in the production and use of solar (photovoltaic) PV technology, both nationally and globally. Based on in depth interviews and survey ...

To determine the necessary solar outdoor power supply, several factors must be evaluated, including 1. energy consumption requirements, 2. location and sun exposure, 3. battery storage capacity, 4. ...

This passion for nature has made Norway one of the most attractive markets for solar cells. Although some of the appeal of cabin life is to take a time-out from technology, electricity is still ...

The potential for a Norwegian-based international industry is large, and there are currently planned several large-scale solar power plants to be developed in Norway.
