

The pledge, developed with 11 senior representatives from utilities and the hydropower value chain, calls on EU and national policymakers to create conditions that support long-duration ...

Paris's mega-project proves that large-scale energy storage isn't just feasible - it's essential for cities aiming to go 100% renewable. As battery costs keep falling (32% since 2020), this model will likely ...

The Paris Pledge is intended as a collective commitment from the hydropower sector to provide the necessary long duration electricity storage to support sustainable, clean industrial growth ...

The Paris Pledge - signed in early September by Zabala Innovation and more than 50 actors across the value chain - argues that only an accelerated roll-out of this technology will ensure ...

"The Paris Pledge unites the sustainable hydropower industry around one clear objective: to provide the storage backbone for a renewable-powered Europe. By scaling up pumped storage, ...

More than 50 utilities, hydropower suppliers, and energy associations have thrown their support behind a new drive to scale long-duration storage across the continent.

While tourists joked about athletes needing portable generators, France's energy sector was already sprinting toward a solution: large-scale energy storage power plants.

(WGTD)---The 200 megawatt solar farm in the Town of Paris is now complete. The site began producing power last December, but the battery park went online this week. It's the state's first ...

Along with the solar plant, TotalEnergies commissioned a 43-megawatt-hours (MWh) battery energy storage system. It is made up of 22 lithium-ion (Li-ion) battery containers designed ...

Paris is taking vehicle-to-grid (V2G) tech to new heights. The 15,000 municipal EVs now function as a distributed storage network, adding 75MWh of flexible capacity during emergencies.
