

Voting 192-3-0, the House of Representatives yesterday approved on third and final reading a bill that would ensure continuous power supply in the Philippines through the use of energy ...

The Philippines has long depended on fossil fuels such as coal and natural gas, leading to an unstable power supply. As a result, remote islands increasingly rely on energy storage systems to maintain ...

The deployment of energy storage will support the national policy goal of increasing renewables to 50% by 2040. The new legislation aims to stabilise power supply and optimise ...

Philippine lawmakers pass ESS Act to support energy storage, strengthen grid reliability, and advance renewable energy targets by 2040.

The Philippines is taking a decisive step toward firm renewable energy capacity, with the latest round of its Green Energy Auction (GEA-4) marking the country's most storage-focused ...

The Philippines is betting on battery energy storage systems (BESS) to achieve its ambitious renewable energy (RE) targets and build a more sustainable energy future.

The passage of Republic Act No. 11234, entitled "Energy Virtual One-Stop Shop (EVOSS) Act" on 08 March 2019 paved the way for streamlining and expediting the permitting ...

The Philippines is set to see 80 MW of battery energy storage systems (BESS) added to its grid with connections via hydro power

As Asia's energy landscape undergoes rapid transformation, the integration of battery energy storage into thermal generation assets is gaining traction. Aboitiz Power Corporation, one of the Philippines' ...

The Philippine House passed a national energy storage framework to support renewable energy goals and grid stability, now moving to the Senate for final approval.
