

Discover our powerful three-in-one decoiler straightener feeder machines for photovoltaic bracket stamping. Elevate your production line to new heights with efficiency and precision.

Stäubli has designed a full range of four and six-axis robotic solutions for solar and photovoltaic production. Our specialized robotic arms combine high reliability, precision and dexterity to manage ...

And here's where automatic stamping becomes the unsung hero. Imagine trying to build a Lego castle without those tiny connector pieces. That's exactly what happens when manufacturers underestimate ...

The AES Corporation introduced "Maximo" today, the AI-powered robot that enhances solar installation speed, efficiency and safety. Maximo is a first-of-its-kind robotic solution that works alongside ...

We own large laser cutting machines, welding robot, steel cold bending machines, stamping machines and aluminum extrusion machines, and we also have our own hot DIP galvanizing ...

Picture this: a factory where robotic arms dance like solar-powered ballerinas, assembling photovoltaic brackets with micron-level precision. That's not sci-fi - it's today's reality in cutting-edge solar ...

Whether you're producing large-scale orders for utility-scale solar farms or specialized mounting systems for commercial projects, Zhongtuo's solar panel bracket machine delivers the ...

Solution display Automatic stamping of solar M-bracket from blanks This line is composed of a 2-station destacker, 6 sets of swing arm stamping manipulators and 5 presses. The destacker...

The Atlas robot was designed to be PV structure and photovoltaic module agnos­tic; its artificial intelligence allows it to be trained on different solar structure and panel combinations.

The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels).
