

Global annual investment in solar PV and other generation technologies, 2021-2024 - Chart and data by the International Energy Agency.

In 2023, approximately 45% of battery capacity and 26% of utility-scale PV capacity were hybrid PV/battery energy storage system projects--relatively consistent with previous years.

For solar-plus-storage--the pairing of solar photovoltaic (PV) and energy storage technologies--NLR researchers study and quantify the economic and grid impacts of distributed and utility ...

o The United States, despite being a leading PV market, is below the global average of other leading markets in terms of PV generation as a percentage of total country electricity generation, with 8% of ...

US Solar Market Insight is a quarterly publication of Wood Mackenzie and the Solar Energy Industries Association (SEIA).

These statistics explain the American solar industry, as hundreds of companies share their top brands, biggest challenges, and outlook for 2025.

In the last decade, solar has grown with an average annual rate of 26 percent, reaching a capacity of over 138 gigawatts in 2023. In that same year, solar energy accounted for 55 percent of new...

The rapid growth in the energy storage market continues to drive demand for project financing, and like any other project-financed asset class, lenders will analyze both the amount and probability of receiving cash flows ...

Companies Procure Record Levels of Solar and Storage Data from SEIA's annual Solar Means Business report show that major U.S. corporations, including Meta, Amazon, Google, Apple, and Walmart are investing in ...

These statistics showcase the current capabilities of solar technology, from panel efficiency rates and lifespan to emerging innovations in hybrid systems and energy storage, demonstrating how ...
