

How are portable power stations tested?

Every portable power station has undergone comprehensive testing, from comparing capacity and charging times to exploring ruggedness and IP ratings. And, of course, my team has taken each unit off-grid to see how they handle real-world use.

What is a pioneer na power station?

The Pioneer Na is the world's first sodium-ion powered portable power station ('Na' being the chemical symbol for sodium in the periodic table). And that's gives it the edge over traditional lithium power stations, delivering superior thermal stability and reliability in cold weather.

How do you charge a portable power station?

Portable power stations are usually charged via the mains- it's quick and efficient, especially for higher-capacity units. Many also let you charge the device from the car using a 12V cigarette lighter socket - ideal for those living the van life or in the RV. You can recharge some devices using solar panels, too.

How much power does a portable power station need?

Small devices like a laptop and coolers tends to need around 60 to 100W of continuous power whereas appliances like fridges can need up to around 800W. So, a large portable power station with a higher output is best for powering large devices, or more devices at once.
