

The Seysun Lagoon Floating PV Project is a landmark initiative that will significantly boost Seychelles' renewable energy capacity. By embracing innovative solutions like floating solar, ...

Meta Description: Discover how solar panels paired with advanced energy storage systems can transform Seychelles' energy landscape. Learn about cost savings, reliability, and eco-friendly power ...

The Seychelles aim to cover 5% of electricity with renewables by 2020 and 15% by 2030. The local power system operator commissioned a Grid Absorption Study to determine the technical ...

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel ...

The Government of Seychelles will identify large rooftops suitable for PV installation. Consumers can then buy a share of the system and pay it back by monthly installments through ...

Now, the huge solar park and wind turbines ensure that seven million kilowatt hours of green electricity are generated every year - enough for around 2,000 households.

The overall aim of the scheme was to kick start the use of solar PV power production in order to reduce the dependence which the Seychelles currently has towards the importation and burning of fossil fuels.

The Solar Farm has doubled the amount of energy produced from renewable energy in Seychelles, reduced the emission of greenhouse gases related to electricity produced from fossil fuel, and ...

Founded in 2010, VetiverTech has installed over 200 solar photovoltaic (PV) systems for homes, schools, hotels and businesses on Mahe, Praslin and La Digue. Our PV modules and inverters are ...
