

Slovenia Energy Storage Grid-Connected Project

Slovenia selected a range of PV, battery storage and grid projects eligible for support via the European Union's Modernisation Fund.

State-owned utility and power generator HSE is targeting 800MW of flexibility assets across Slovenia by 2035, including pumped hydro energy storage (PHES) and battery energy storage systems (BESS).

Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by 2035, including 590MW of pumped hydro energy ...

The latest smart grid PCI project, GreenSwitch, connects seven partners from Austria, Croatia, and Slovenia. It addresses the challenges of integrating decentralized energy resources into the grid, ...

The SINCRO.GRID - Phase 1 project demonstrated how distribution and transmission system operators could enable their existing infrastructure to accept greater quantities of electricity from renewable ...

The SINCRO.GRID - Phase 1 project will provide for more efficient use of the existing electricity grid in Slovenia and Croatia, which will enable the existing infrastructure to accept larger ...

Maribor's grid-side energy storage initiative positions Slovenia as a Central European leader in smart energy management. By balancing renewable integration with grid reliability, this project offers a ...

Summary: Slovenia is rapidly adopting advanced energy storage systems to support renewable integration and grid stability. This article explores the latest technologies, market trends, and ...

As part of the project, battery energy storage systems with a total capacity of 10 MW will be installed in various locations across Slovenia. This is enough to meet about 15% of the domestic demand for the ...

Slovenia has added three large solar projects to its national Development Program Plan for 2026-2029, paving the way for new solar capacity to enter the grid from late 2027 and early 2028.
