

Our researchers constantly research and bring you updated lists of renewable power generation projects using solar, wind, perpetual motion, footstep power generation as well as hybrid generation systems.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

In this week's list, we take a deep dive into the uses and application of solar power, including agriculture, aviation and retail. 10. Solar-powered manufacturing. EV leader Tesla is ...

Solar energy projects harness the power of the sun, converting it into electricity or heat for various uses. This technology is pivotal in addressing some of the most pressing challenges of our ...

Globally, renewable power capacity is projected to increase almost 4 600 GW between 2025 and 2030 - double the deployment of the previous five years (2019-2024). Growth in utility-scale and distributed ...

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.
