

Synergy has energised its 500-MW/2,000 MWh Collie battery energy storage system (BESS) in Western Australia, the largest facility of its kind owned by a state-controlled company.

The projects include the 100 MW 4-hour Merredin battery energy storage system (BESS) approximately 230 kilometers east of Perth, and the Stage 1 Waroona Renewable Energy Project, 120 ...

Australian renewable energy developer Tonic Group has received federal environmental approval for a 440MWh solar-plus-storage facility in Western Australia in less than a month.

Solar technology manufacturing major Trinasolar has launched plans to build a 400 MW solar farm and 400 MW / 1.6 GWh battery energy storage system in the northern Wheatbelt region of Western Australia.

As WA prepares to retire its coal and gas capacity, more long-duration storage will need to be brought online to address persistent and longer periods of low renewable energy output, which are ...

The Regional Joint Development Assessment Panel has unanimously agreed to allow construction of a 200-MW solar farm supporting a four-hour, 200-MW/800-MWh battery facility on farmland ...

SynergyRED, a wholly owned subsidiary of Synergy, has secured environmental approval for a 2GW solar, wind and battery energy storage system (BESS) project in Western Australia.

This pioneering project is Western Australia's first large-scale solar and battery energy storage system, as well as the region's first solar hybrid project-setting a new benchmark for renewable energy in ...

PSW Energy has established itself as one of the leading solar companies in Western Australia as of 2025. The latest industry report from Solar Nerds (2025 Awards Edition) indicates that PSW Energy ranks ...
